A REPORT ON NATIONAL TECHNOLOGY DAY CELEBRATIONS

National Technology Day is celebrated every year on May 11, to mark Indian technological advancement. The day, May 11, has been declared National Technology Day by the Indian Government in order to commemorate the history of India's technological capability and expertise. The day holds importance of its own, as on this particular day, India achieved a huge technological progression. The first, indigenous aircraft 'Hansa-3' was test flown from Bangalore. India performed successful test firing of the Trishul missile on the same day and also executed three successful nuclear tests, carried out at Pokhran, in Rajasthan. It was only on May 11, 1998, when India successfully tested 5 nuclear powered bombs in Pokhran, Rajasthan, to demonstrate its defense capability. This is regarded as one of the significant moments of Indian history.

The NSS Unit celebrated "National Technology Day" On May 11th 2016 By Organizing A Guest Lecture By ICT (Instructor) Chander Naveen On "Use Of Internet Technology". Mr. Chander Naveen said that National Technology Day glorifies the importance of science in day to day life and motivates students to adopt science as the career option. He also told how we can achieve good position in our career by using internet. In his lecture, he gave details about the history of internet and the evolution of data transmission and how students can enhance their services and career in every field by using internet. 67 students of college NSS Unit took advantage of this lecture. In the end, Dr. Kuldeep Singh ji principal of the college honored the resource person with token of remembrance and thanked him.
